STAT

Dear [Redacted]

STAT

This note is to authorize Alternative 1 for the modification of the [Redacted] stereoscope. We feel that the polarizing technique will offer us the greatest versatility in varying the light instead of the previous reostatic controls.

STAT

I wish to express our appreciation for your kind response and aid in our current experimentation in phase contrast microscopy. Please keep me advised as to the [Redacted] and when delivery on the first models can be expected.

STAT

Sincerely yours,

[Redacted]
